Automation and Control Services

Parts Management Service

Carefree maintenance for maximum uptime

A parts management contract from Telemecanique Automation and Control Services provides you with instant access to Schneider Electric and other industrial products on your plant floor for quick change-out in the event of a process breakdown.

This service provides consignment inventory, maintains complete inventory records, keeps equipment at a known revision state, and repairs or replaces broken equipment as needed, all for an annual contract price.

The parts management service offers:

- **24/7 access to inventory** – reducing downtime for all shifts
- **Periodic, onsite monitoring of parts storage** – providing an accurate record of stocked equipment, including revision, to assure maintenance readiness
- **Fast, high-quality repairs** – included in contract price, and processed onsite by Schneider Electric representative, eliminating additional purchase orders, purchasing and shipping/receiving burden
- **Inventory owned by Schneider Electric** – eliminates inventory costs, capital expenditures, depreciation concerns

For more information, please call 888-266-8705 option 3, and ask for field service.
